

Product Obsolescence Notification

Issue Date: February 22, 2016

Dear Customer,

Statek announces the obsolescence of CX1 and CX2 **THRU-HOLE CRYSTALS**.

This decision is part of our product life cycle management and reflects changes driven by the market demand.

Statek is in the process of quoting and accepting EOL orders. All thru-hole products are expected to become obsolete by the end of the calendar year 2016.

(Please note that all surface mount crystals will continue to be available in the CX1 & CX2 package sizes. Obsolesce only refers to CX1 & CX2 Thru-Hole crystals)

Product packages include:

CX1, CX2 **03, 02, 04, 05, 06 & 07** thru-hole versions only All frequencies

Example Part numbers for reference only:

CX1V03-32.768K, 30/I
CX103-10.0M, 100/100/-/I
CX2H02-32.768K, 100/I

Please contact your sales representative with any questions, to discuss alternative product solutions and placement of EOL buys.

We thank you for your understanding and look forward to continuing to support frequency control product requirements.
